# Administering a SQL Database (2025)

A five-day course in administering a SQL Server 2025 database infrastructure: deploying and configuring instances, implementing security, monitoring performance and automating administrative tasks.

| DURATION | CONTENT | LEVEL | DELIVERY |
|---|---|---|---|
| 5 Days | 16 Modules | Intermediate | Instructor-Led · Bootcamp · Self-Paced |

## WHAT SETS THIS COURSE APART

### 01 Updated for SQL Server 2025

Administration is taught on SQL Server 2025 with SSMS 22, PowerShell and command-line tools.

- SSMS 22 used across the course modules
- Optional module on new features and enhancements
- JSON, T-SQL, security and performance enhancements

### 02 AI features in the database engine

Students are introduced to the AI and machine learning capabilities in SQL Server 2025.

- Lesson on AI and machine learning integration
- Hands-on lab exploring AI integration
- Delivered in optional Module 16

### 03 Lab simulations, at the student's pace

Students step back and forth through each lab exercise, revisiting any step as needed.

- Runs in a browser, with no setup required
- Replay any time, including after class
- Covers the lab in every module

## ALSO INCLUDED

| | |
|---|---|
| **AI Tutor, 24/7** | An interactive AI assistant built into the courseware platform answers questions on every course topic, at no extra cost. |
| **Bootcamp mode** | One capstone lab per day. Students apply that day's skills to a new scenario with no procedure and no hints. |
| **Security** | Authentication, roles, permissions, encryption, auditing and dynamic data masking. |
| **Recovery** | Full, differential and log backups, and point-in-time restore. |

## CURRICULUM AT A GLANCE

| | |
|---|---|
| DAY 1 | **Security.** Authentication, server and database roles, and authorizing access. |
| DAY 2 | **Compliance.** TDE and Always Encrypted, auditing, and advanced compliance features. |
| DAY 3 | **Backup.** Recovery models, backups, restores, and importing and exporting data. |
| DAY 4 | **Automation.** SQL Server Agent jobs, alerts and notifications, and PowerShell. |
| DAY 5 | **Monitoring.** Extended Events and DMVs, troubleshooting, and new features (optional). |

**What your team leaves with**

The ability to deploy and configure SQL Server 2025 instances, implement security models and role-based access control, monitor and optimize performance, automate administration with SQL Server Agent and PowerShell, and implement backup, recovery and disaster recovery strategies.

**Prerequisites:** basic Windows knowledge, working knowledge of Transact-SQL and relational databases, familiarity with earlier versions of SSMS, and database design experience.
